ABOUT ME

I'm a senior software engineer with 8+ years of experience in web and mobile development, specializing in **JavaScript**, **TypeScript**, and **ReactJS**. I build scalable, high-performance applications with clean architecture and a strong focus on UI/UX.

I'm passionate about crafting user-friendly interfaces using **HTML** and **SCSS**, and continuously explore ways to improve user experience. I also have hands-on experience developing mobile apps with **React Native** for iOS platforms.

Currently, I lead front-end teams across web and mobile projects—resolving technical challenges, mentoring team members, and ensuring smooth sprint delivery and collaboration.

I enjoy solving complex problems and staying up to date with the latest technologies to deliver intuitive, impactful digital products.

OBJECTIVE

To contribute to impactful web and mobile projects by delivering clean, scalable code and intuitive user interfaces. I strive to support team growth through mentorship and process improvement, ensuring smooth and high-quality delivery.

My career goal is to grow into a Principal Front-End Engineer, continuously improving my skills and driving modern technology adoption to enhance performance, scalability, and user experience.

LANGUAGE

English: Good reading and writing skills. Intermediate speaking ability.
TOEIC score: 515 (2018)

EDUCATION

University of Information Technology   Aug 2012 - June 2018

Engineer, Major Information system

SKILLS

Programming languages	JavaScript/Typescript (proficient), basic knowledge of .NET, Python
Front-End Technologies	HTML5, CSS, SCSS (proficient)
Framework & Libraries	ReactJS, React Native (proficient)
	AngularJS, Kendo UI, Sencha ExtJS, MUI, Axios, Redux Toolkit, Tamagui, Zustand, i18next, React Hook Form, Formik, Yup, TinyMCE

Additional Concepts & Technologies	Design Patterns, Object-Oriented Programming (OOP), RESTful Web Services, MVVM, MVC, SharePoint
Version Control	Git, SourceTree
Project Management Tools	Azure DevOps, Redmine

PROJECTS

PSSB Project
October 2024 - Now

Customer	Nation Healthcare Group (NHG)
Position	Mobile Developer
Responsibilities	- Developed the mobile application for iPad using React Native and Expo - Researched and implemented solutions for integration with payment terminals and Epson printers in collaboration with hardware vendors - Managed app deployment via TestFlight - Acted as a Scrum Master to coordinate sprint tasks and ensure timely version delivery. - Handled source control management, including code reviews, merging, and daily progress reporting

NCA Project
Febuary 2021 - Now

Customer	Nation Healthcare Group (NHG)
Position	Front-end Developer
Responsibilities	- Built and maintained the portal for both intranet and internet environments - Worked with Backend and BA teams to define requirements and deliver new features - Supported deployments to UAT and production environments - Oversaw source code management, including reviews, merges, and progress updates

Taggle Platform Project
December 2020 - Now

Customer	Singapore's Small & Medium Clinic, Public Community in Singapore, Province of Philippines (Sto Tomas)
Position	Front-end Developer
Responsibilities	- Developed the internet-based portal used across multiple client organizations - Collaborated with Backend and BA teams to gather requirements and implement scalable features - Researched and designed new features, collected user feedback, and iteratively improved the portal - Participated in UAT and production deployments - Managed Git-based source control, CI/CD, conducted code reviews, and ensured regular progress reporting

XSPERA Project
December 2019 - October 2020

Customer	SAI GON JOINT STOCK COMMERCIAL BANK
Position	Front-end Developer
Responsibilities	Developed internal web products and supported delivery to clients

Project of Canada Company (in Global Cybersoft)   Aug 2018 - December 2019

Customer	Ramsoft
Position	Front-end Developer
Responsibilities	Development client-side web application radiology

Project of France Company (in Global Cybersoft)   Mar 2018 - July 2018

Customer	France's customer
Position	Front-end Developer
Responsibilities	Development client-side web application radiology

WORK EXPERIENCE

December 2020 – Now

Taggle
- Lead the Front-End Team, managing both the **Web Team** (2 developers) and **Mobile App Team** (3 developers)
- Developed and maintained web applications using **ReactJS**, AngularJS and mobile applications using **React Native**
- Built a **Portal Website** for administrators and doctors to perform analytics and manage system operations
- Built a **Kiosk iPad Application** for self-service in clinical or customer-facing environments
- Collaborated closely with Business Analysts and Backend Teams to ensure high-quality deliverables and smooth project execution
- Contributed to planning, code reviews, and deployment processes to maintain development standards and timelines

December 2019 – October 2020

Xspera Vietnam
- Developed front-end applications using AngularJS, ReactJS, Kendo UI, and SharePoint
- Built and integrated Microsoft Teams Apps and Power Apps components for enterprise solutions
- Promoted to Front-End Team Lead, mentoring a fresher and an intern to support their technical growth and project delivery
- Gained hands-on experience in building solutions on the SharePoint platform, focusing on custom UI components and workflows
- Collaborated with cross-functional teams to design scalable, maintainable front-end systems for internal tools and client projects

March 2018 -December 2019

Global Cybersoft
- Delivered front-end consulting services with a strong focus on Sencha ExtJS, JavaScript, SCSS/CSS, and HTML5
- Applied solid understanding of web architectural patterns, particularly MVVM, to build scalable and maintainable UI components
- Contributed to project estimation and improved problem-solving capabilities, supporting efficient development workflows
- Collaborated with development teams to resolve complex UI/UX issues and ensure performance optimization across browsers
