● SUMMARY

Senior front-end engineer with **8+ years** building web and mobile products in JavaScript, TypeScript, React and React Native. Leads a **five-engineer front-end team** at Taggle, shipping a healthcare portal and a self-service iPad kiosk that runs on **around 200 devices** and serves **2,000+ patients a day** in Singapore. Has also independently designed and launched two products: **COGINGON**, a native iOS food guide published on the App Store, and **Tabi no Chan**, a visa operations platform processing about 900 applications a month.

● SKILLS

Core	JavaScript, TypeScript, React, React Native, Expo, HTML5, CSS / SCSS
State & data	Redux Toolkit, Zustand, Axios, React Hook Form, Formik, Yup, i18next, RESTful APIs
UI & architecture	MUI, Tamagui, Kendo UI, Sencha ExtJS, AngularJS, TinyMCE; design patterns, OOP, MVVM, MVC
Additional stack	SwiftUI, Next.js, Go, Python / FastAPI, Firebase, Google Cloud Run, BigQuery, LLM integration (Claude, LiteLLM)
Delivery	Team leadership (5 engineers), mentoring, code review, Scrum Master, sprint planning, UAT and production release
Tools	Git, SourceTree, CI/CD, Azure DevOps, Redmine, TestFlight, App Store Connect, SharePoint, Teams Apps, Power Apps
Domains	Healthcare portals and self-service kiosks, radiology clients, banking and enterprise tools, multi-tenant SaaS

● EXPERIENCE

Taggle Pte Ltd · Senior Software Development Engineer

Dec 2020 – Present

Singapore-based healthcare SaaS (remote)

Ho Chi Minh City

- Lead the front-end organization: a **web team of 2** and a **mobile team of 3**; own code review, merges, CI/CD, UAT and production releases.
- Sole front-end engineer on the **PSSB self-service iPad kiosk** for National Healthcare Group: selected the React Native / Expo stack and delivered the application from prototype to production.
- Integrated payment terminals and Epson receipt printers in collaboration with hardware vendors, authoring the **expo-redpark-serial** and **expo-pssb-keypair** native modules and adapting **react-native-esc-pos-printer** for the Epson ePOS SDK.
- Ran TestFlight distribution on a monthly release cycle and acted as Scrum Master for sprint coordination.
- Architected the **shared front-end foundation for the admin portals** used by administrators and doctors for analytics and operations: component library, project structure and coding conventions that enable the team to deliver features independently.
- On the NCA project, built and maintained the intranet and internet portals, supported UAT and production deployments, and reported daily progress to stakeholders.

Xspera Apac · Front-End Developer, promoted to Team Lead

Dec 2019 – Oct 2020

Enterprise and banking solutions

Ho Chi Minh City

- Built front-end applications in AngularJS, React, Kendo UI and SharePoint for Saigon Commercial Bank (XSPERA) and internal tools.
- Delivered Microsoft Teams Apps, Power Apps and custom SharePoint UI components and workflows.
- Promoted to Front-End Team Lead; mentored a junior developer and an intern to independent delivery.

Global Cybersoft · Front-End Developer / Consultant

Mar 2018 – Dec 2019

Healthcare clients in Canada and France

Ho Chi Minh City

- Delivered radiology web clients for Ramsoft (Canada) and a French customer in Sencha ExtJS, JavaScript, SCSS and HTML5.
- Applied MVVM to build maintainable UI components and resolved complex cross-browser and performance issues in clinical environments.

● PERSONAL PROJECTS

COGINGON · Local food guide for iOS

Sep 2026 – Present

Solo developer · Published on the App Store

apps.apple.com/app/id6818789886

Bilingual (Vietnamese / English) dining guide for Vietnamese cities on iPhone and iPad, featuring destination guides, editorial dish ratings and personalized meal recommendations.

- **iOS app (SwiftUI):** ranked bilingual search, MapKit map with rating markers, meal recommendation flow and SwiftData offline bookmarks, with full Dynamic Type and Reduce Motion support.
- **Backend and portal:** Go API on Cloud Run that verifies Firebase ID tokens and enforces permissions; a Next.js editor portal for publishing and moderation, allowing content updates without an app release.
- **Release:** owned App Store submission end to end, including privacy disclosures, account deletion and versioned releases.

Stack: Swift / SwiftUI, SwiftData, MapKit, Go, Firebase Auth, Firestore, Cloud Storage, Cloud Run, Next.js, React

Tabi no Chan · Visa document platform

Jun 2026 – Present

Solo full-stack developer · In production at Hien Trang Visa

tabinochan.hientrangvisa.vn

Operations platform for a Vietnamese visa consultancy, processing **about 900 applications a month** for 5 daily staff users and **30+ partner agents**.

- **Web portal and backend:** Next.js staff and agent portal (case management, analytics, QR-verifiable receipts) backed by a FastAPI service on Cloud Run.
- **Document AI:** Claude extraction via LiteLLM, MRZ passport parsing and multi-engine OCR, eliminating manual data entry.
- **Operations:** Expo staff app, Lark and Zalo bot integrations and automated consulate mailbox monitoring, covered by 600+ Python and 90+ web regression tests.

Stack: TypeScript, Next.js, React Native / Expo, Python / FastAPI, Claude via LiteLLM, Firebase, BigQuery, Cloud Run, Cloud Scheduler

● EDUCATION & LANGUAGES

Education **University of Information Technology, VNU-HCM (2012 – 2018)**
Engineer's degree in Information Systems

Languages Vietnamese (native). English: professional reading and writing, intermediate speaking.
